REVIEWERS LIST

The following is a list of the reviewers of manuscripts submitted to the *Archives of General Psychiatry* during 2011. As the Editor, I feel that the many hours reviewers give gratis to ensure that authors can present the highest quality of science is underappreciated by the public but incredibly valuable for the field. Many authors whose manuscripts were rejected have thanked the anonymous reviewers for helping them prepare a better manuscript for another journal. So, I salute the reviewers and thank you for your contributions.

Joseph T. Coyle, MD
